Response to Amendment

1. Claims 1 and 28 rejected under 35 U.S.C. 112; second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention are withdrawn in view of applicant's amendment.

1. Claims 1-6 rejected under 35 U.S.C. 102(b) as being anticipated by Franz (3,468,096) are withdrawn in view of applicants amendment.

2. Claims 1-6, 10 and 28 rejected under 35 U.S.C. 102 (b) as anticipated by or, in the alternative, under 35 U.S.C. 103 (a) as obvious over McClain (3,451,758) are withdrawn in view of applicant's amendments.

3. Claims 1-6 and 28 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Klein (3,175,331) are withdrawn in view of applicant's amendment.

4. Claims 1, 4, 7 and 28 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over McDonell et al (5,282,900).

5. Claims 1-3 and 28 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hsu et al (6,171,007) are withdrawn in view of applicants amendment.

6. Claims 1 and 28 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Stein (4,050,825) are withdrawn in view of applicant's amendment.

7. Claim 8 rejected under 35 U.S.C. 103(a) as being unpatentable over McClain (3,451,758) is withdrawn in view of applicants amendment.

Response to Arguments

8. Applicant's arguments with respect to claims 1-10 and 28 have been considered but are moot in view of the new ground(s) of rejection.

9. Claims 1-3, 8-9 and 28 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over DeVitis (2003/0220212).

10. DeVitis discloses a reinforced bar soap comprising a soap bar comprising a reinforcement member in the interior portion thereof and comprised of a mesh (0003) materials such as synthetic and natural fibers, sponges and wood. Also, said material may include polymers and other synthetic material (0007). See figure 1.

11. As this reference teaches all of the instantly required it is considered anticipatory.

In the alternative that the above disclosure is insufficient to anticipate the above listed claims, it would have nonetheless been obvious to the skilled artisan to produce the claimed composition, as the reference teaches each of the claimed ingredients within the claimed proportions for the same utility.

12. Claims 1, 8-9 and 28 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dulin et al (5,221,506).

13. Dulin et al disclose a soap bar comprising a core insert material surrounded by soap and wherein said core material comprises a sponge or non-woven filamentary structure (claim 1 and figure 1).

14. As this reference teaches all of the instantly required it is considered anticipatory.

In the alternative that the above disclosure is insufficient to anticipate the above listed claims, it would have nonetheless been obvious to the skilled artisan to produce

the claimed composition, as the reference teaches each of the claimed ingredients within the claimed proportions for the same utility.

15. Claims 1, 9 and 28 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Brown (2004/0110653).

16. Brown discloses an economical soap bar element having a core comprised of polystyrene polymer, or of water-soluble or biodegradable materials such as oxycellulose polymers or polyvinyl alcohol (0002; 0012; 0017). Brown further teaches that additional ingredients are well known as cores such as scrubbing pads (0006). See figure 1.

17. As this reference teaches all of the instantly required it is considered anticipatory.

In the alternative that the above disclosure is insufficient to anticipate the above listed claims, it would have nonetheless been obvious to the skilled artisan to produce the claimed composition, as the reference teaches each of the claimed ingredients within the claimed proportions for the same utility.

18. Claims 1, 9-10, 28 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hopkins (4,277,358).

19. Hopkins discloses an environmentally degradable soap bar comprising fatty acid soap and other well known detergent materials (col. 3, lines 40-52), wherein said soap bar comprises an insert material such as polyvinyl alcohol, hydroxypropyl cellulose and polyethylene oxide (col. 2, lines 21-35). Hopkins further teaches that said soap material is molded around said insert member (claim 1 and figure 2).

20. As this reference teaches all of the instantly required it is considered anticipatory.

In the alternative that the above disclosure is insufficient to anticipate the above listed claims, it would have nonetheless been obvious to the skilled artisan to produce the claimed composition, as the reference teaches each of the claimed ingredients within the claimed proportions for the same utility.

21. Claims 2-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown (2004/0110653) in view of McClain (3,451,758).

22. Brown is relied upon as set forth above. Specifically, Brown lacks the specific teaching of the scrubbing material as an insert in his soap bar.

McClain discloses a scouring pad comprising a nonwoven fibrous material such as synthetic fibers, metallic fibers, or various animal or vegetable fibers and mixtures thereof. McClain teaches that the metallic fibers may comprise steel wool and stainless steel fibers and the synthetic fibers include nylon (col. 2, lines 60-65). McClain further teach that said scouring pad has a washing compound such as soaps and other anionic synthetic detergents that are deposited within the scouring pads (col. 4, lines 15-25).

Note, see example 1.

23. It would have been obvious to one of ordinary skill in the art to the scouring pad of McClain as an insert to the bar element of Brown because Brown teaches that it is well known in the art to include scouring pads as cores in soap bars (0006) and McClain teaches that scouring pads are comprised of materials such as nylon and metallic fibers. Therefore, one of ordinary skill in the art would have been motivated to include the scouring pads of McClain in the soap bars of Brown because Brown teaches that said combination is readily known in the art for its intended purpose.

Conclusion

24. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
